

Practical 9

Project Management Tool (Taiga)

1. Write steps to create a project in Taiga.
2. Which functionalities are provided by Taiga for any Project? List and explain their purpose.
3. How can you change permissions in Taiga? Write steps to create new points value in Taiga.[Hint: explore the settings menu]
4. Write steps to create a sprint and tasks in Taiga. Explain Issues in Taiga.

Taiga is a project management platform for agile developers & designers and project managers who want a beautiful tool that makes work truly enjoyable.

Powerful

Customize everything. Easily. You are in full control.

Simple & Intuitive

Figuring out the tool is ridiculously easy.

Highly Designed

Simple & Gorgeous! Beautiful to look at all day long.

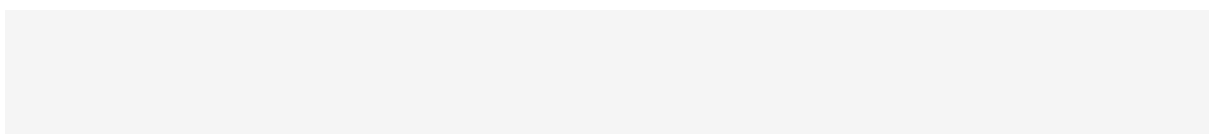

Customizable

Give each project its own personality.

Scrum

Scrum is an iterative and incremental agile software development methodology for managing product development.

The product backlog is what will ultimately be delivered, ordered into the sequence in which it should be delivered. Product Backlogs are broken into manageable, executable chunks named sprints. Every certain amount of time the team initiates a new sprint and commits to deliver a certain number of user stories from the backlog, in accordance with their skills, abilities and resources. The project advances as the backlog becomes depleted.

CREATE PROJECT

The screenshot shows the Scrum project dashboard for 'Online Book Store'. The left sidebar contains navigation links: Online Book Store, Scrum, Backlog, Issues, Search, Wiki, Team, and Settings. The main area displays the 'Scrum' section with a progress bar at 0% and statistics for defined, closed, and points per sprint. A 'SPRINTS' section on the right indicates no sprints are currently active. A 'Let's start with the basics' checklist is overlaid, showing steps like 'Create 1st Project', 'Add User Stories', and 'Invite Team members'. A '+ USER STORY' button is visible in the backlog area, and a message states 'The backlog is empty!' with an 'ADD A USER STORY' button.
